

NSAi has helped clients in nine countries on four continents meet and exceed their business goals.

We would like to help you exceed yours.

Network Systems Architects, Inc. (NSAi) is an IT professional services firm. Started in 1998, we have grown our client base and reputation by providing high quality services to Global 1000 customers, including Sun Microsystems, Qwest, Agilent Technologies, The United States Air Force, British Telecom, EchoStar, and United Pan-European Communications.

NSAi focuses on five service delivery practices:

- Enterprise Management
- Security
- Networking
- Systems
- Project Management

NSAi has the right people and the right methodology to ensure the success of your technology-based initiatives. We provide a full range of certified skills to direct and deliver successful solutions on time and on budget. We have developed a comprehensive, proven methodology based on past engagements with clients in a wide range of industries.

Our expertise in infrastructure and security solutions helps companies build secure, profitable relationships with their employees, their business partners, and with their customers. We provide value to our clients' business through strategic staffing, project-based engagements, and complete outsourcing services.

Our pragmatic approach to partnering with, and becoming an extension of, our clients' internal teams has earned us a reputation for unparalleled dedication. The NSAi team acts as a force multiplier for our clients by directly engaging against client problems while concurrently designing and implementing best practices to enable our client's IT staff to operate at maximum effectiveness.

We work closely with the leading technology vendors including Hewlett Packard, Sun Microsystems, IBM, Cisco, Foundry Networks, Veritas, Vytex Wireless, and Agilent Technologies. Our team has the focus, the experience, and the partnerships to ensure the success of your next IT infrastructure project.

“NSAi: Engineering Solutions for Business Problems.”

NSAi is best described by our slogan “Engineering Solutions for Business Problems.” We believe that technology is a tool to create business value, not an end in itself. NSAi creates business value for our clients by focusing on creating world-class solutions within our core areas of excellence:

Enterprise Management

NSAi Engineers are experts in the design and implementation of monitoring and management systems focused on service management. We design our monitoring and management architectures to increase the ROI (Return on Investment) of the organization’s networks, systems, and applications by increasing uptime and decreasing MTTR (Mean Time to Repair).

Security

NSAi’s comprehensive security assessments include penetration testing and vulnerability assessments, network and server hardening, and routing protocol security audits. In addition, we offer security policy review and creation, physical security audits and TSCM (Technical Surveillance Counter Measures) audits. NSAi’s secure network and server design and implementation include, firewalls, IDS (Intrusion Detection Systems), and VPNs (Virtual Private Networks).

Networking

NSAi designs and implements highly scalable, highly-redundant enterprise and carrier class networks: LAN’s (Local Area Networks) using both wired and industry standard wireless LAN technology, WAN’s (Wide Area Networks) utilizing Leased Lines, Frame Relay, and VPN’s (Virtual Private Networks), and MAN’s (Metropolitan Area Networks) utilizing both wired and long-distance wireless technologies.

Systems

NSAi engineers design and implement state-of-the-art, highly reliable system architectures capable of supporting mission critical business operations. Our client centered design approach is vendor neutral, enabling us to utilize Solaris, Linux, HP-UX, AIX, Microsoft Windows, and Novell NetWare where they best meet the business requirements.

Project Management

PMI (Project Management Institute) certified project managers deliver results on time and on-budget. We believe that proactive Project Management is one of the keys to our success and to our client’s success.
